Rails Bridge Conference Speaker Write Speak Code Conference Speaker

<Experience>
SnapMobile Full Stack Developer | 2018 - Current Created and maintained mobile applications as well as progressive web apps using Ionic, Express, Angular, Mongo, and Node. Used tools such as AWS, Heroku, Git, and payments with Stripe. Well versed in Agile and Scrum methodologies. Created the company's client estimation process and helped communicate technical concepts and project progress to clients.

Latin School of Chicago CS Faculty | 2016 - 2018 Taught web development and computer science. Created and maintained websites for the school.

General Assembly Web Dev Instructor | 2015-2018 Instructor for 12 week web development boot-camp. Taught: Javascript, Ruby, Sinatra, Rails, Backbone, Postgresql, Mongo, Node, and React Instructor for Front End web development course.

Health Engine Web Developer | 2015-2016 Worked with development team to create a concierge service website using Ruby on Rails and Twilio. As a fullstack developer, I worked on both the frontend as well as the backend for different features. Worked with dev team to organize launch phases. Mentored another intern and wrote scripts to automate workflow.

<Projects>
Mobile Apps - Made with MEAN stack and the Ionic framework
