Tools Git, Heroku, Digital Ocean, Github

< Projects >

Humble Hearts

Team Captain and Backend Developer for this project. Website donated to the Humble Hearts Foundation. Constructed during the Nerdery Overnight Website Challenge.

http://humblehearts.herokuapp.com/

Patroll

The app enables users to configure web scrapers, tailored to specific sites, and receive alerts via email and reports in their browsers whenever and wherever their personal data appears.

Hot Work Permit

This project was made in 24 hours as part of the Architecture, Engineering, Construction (AEC) Hackathon and won second place in solving the industry's biggest problem. It's purpose is to simplify the handling of hot work permit forms on the construction site while still ensuring that legal OSHA requirements were still met.
